

Partnering for Success:
Promoting Technology Advancements for the Dental Industry

May 5-8, 2010 – San Diego, CA

Program: **HIPAA Update:** *Privacy / Policy*
Date: May 6, 2010, 11:15 a.m. – 12:15 p.m.
Speaker: Dr. Sybil Ingram-Campbell
CEU's: 1

Description

The American Recovery and Investment Act of 2009 dramatically expanded the scope of the Health Insurance Portability and Accountability Act's (HIPAA) Privacy and Security Rules. The Act requires operational changes for all healthcare providers, health plans and their business associates.

In August, the Department of Health and Human Services issued an interim final rule that clarifies the breach reporting obligations for covered entities and their business associates. The rule provides more guidance on the meaning of secured and unsecured protected health information.

The HIPAA changes increase penalties for various violations and significantly expand the other remedial actions available for HIPAA noncompliance. To ensure compliance, healthcare providers should update their HIPAA policies, audit their privacy and security practices and train their staff.

Objectives

1. Highlight key changes to HIPAA Privacy and Security rules
2. Overview ARRA and HITECH Legislation
3. Review breach notification provisions

Speaker:

Dr. Sybil Ingram-Campbell is a respected and experienced health science professional, specializing in various areas associated with healthcare, homeland security and regulatory compliance. With over twenty years of healthcare experience, she has been one of the nation's foremost speakers and active consultants for the HIPAA implementation challenges, addressing all major aspects of the Administrative Simplification Subtitle and affected entities/stakeholders. Dr. Ingram-Campbell has served as a clinician, clinical researcher and instructor, emergency preparedness and readiness specialist as well as serving as an independent validation and verification compliance manager for multiple national providers of healthcare services. She has held key positions for healthcare industry leaders such as HBOC/McKesson, Johnson & Johnson, Abbott Labs, the Georgia Technology Authority and the Centers for Disease Prevention and Control (CDC). In addition, Dr. Ingram-Campbell is nationally board certified by the American Society of Clinical Pathologists, a certified INFOSEC professional by the Information Security & Audit Control Association and the US National Security Agency. She is a dual award recipient from the Centers of Disease Control Prevention as well as a Merit award recipient from the US Department of Health and Human Services. As a volunteer, she is an active Georgia state representative for the National Family Caregivers Association and has an inventor's patent-pending product with the U.S. Patent & Trademark Organization. Dr. Ingram-Campbell speaks nationally and internationally on topics concerning leadership, information privacy & security as well as family care giving issues.
